

Designed for covert operations the FTL 2.0 is one of our most flexible, thin and lightest soft armor solution.

Made in pure polyethylene the FTL is designed for extreme situations and is an ideal choice if you are looking a low profile and very comfortable solution.

The PGD-BRAVO (NIJ IIIA+27J) is a hybrid made of Spectra Shield from Honeywell and Anti trauma aramid.

PGD-BRAVO is tested according to NIJ 0101.06 IIIA and can stop up to a .44 Magnum aswell as stabs up to 27 joules according to NIJ 0115.00

The soft armor is sealed with our Ultrasonic heat sealing technology, making it 100% water resistant.

- NIJ standard 0101.06 & NIJ 0115.00
- Thickness insert: 7 mm
- Stab proof up to 27 joules (S1 blade)
- Areal density: 5.6 kg/m²
- Flexibility: 6/10
