

Designed for covert or overt operations with a need of heavy stab protection, the DELTA IIIA+55J is a great choice.

The multilayer construction of Honeywell Goldshield offers protection from high velocity handguns as well as pointed and edged instruments.

The PGD-Delta (NIJ IIIA+55J) is made with a special composition of Goldshield from US Honeywell.

PGD-Delta is tested according to NIJ 0101.04 and stops up to a .44 magnum. Furthermore the solutions is designed to stop the notorious S1 blade according to NIJ 0115.00 up to 55joules with an avarage penetration at 10 mm!

The soft armor is sealed with our Ultrasonic heat sealing technology, making it 100% water resistant.

- NIJ standard 0101.04 & NIJ 0115.00
- Thickness insert: 4.95 mm
- Stab proof up to 55 joules (S1 blade)
- Areal density: 5.35 kg/m²
- Flexibility: 10/10
